WORKPACKAGE 4:
Case Study Selection Criteria
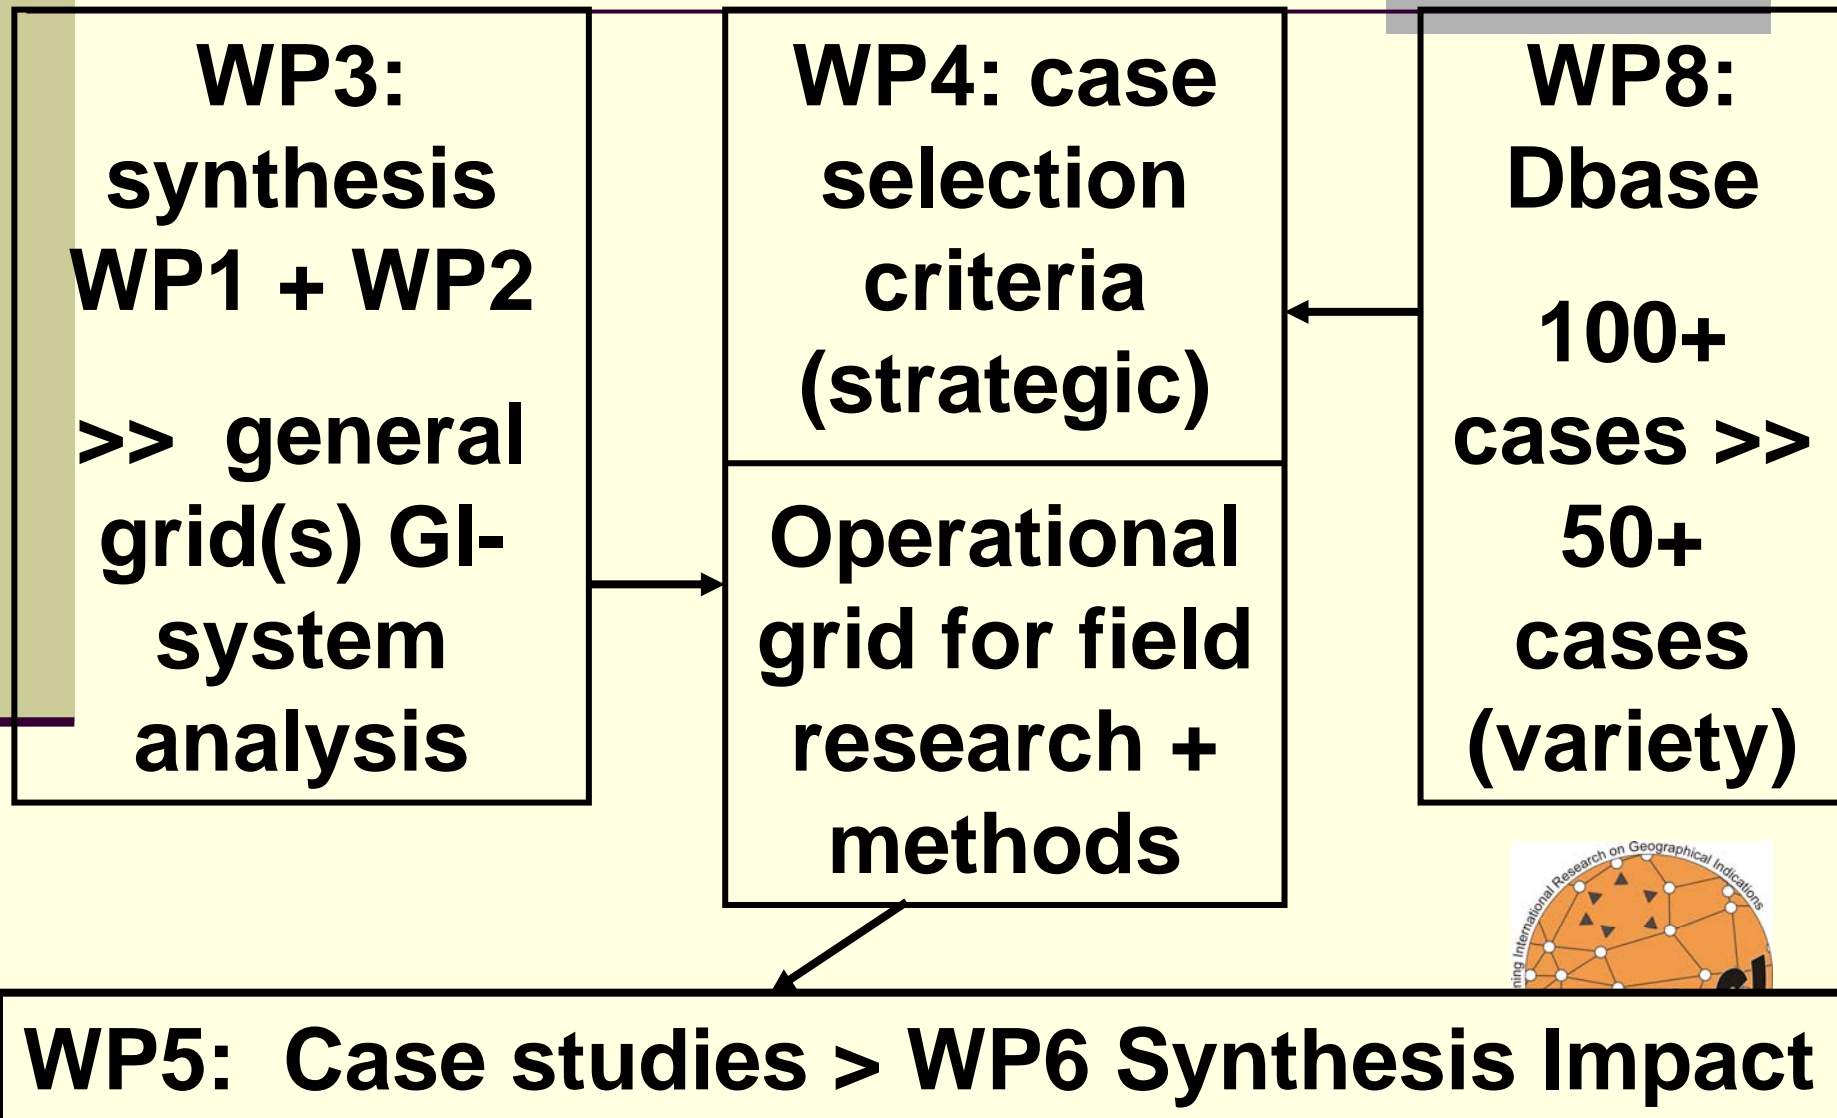

Hielke van der Meulen

Wageningen University

Aim of presentation

- 1. Role Workpackage 4

- 2. Implications scope SINER-GI

- 3. Explain considerations criteria

- 4. Explain selection procedure

Role WP4 in SINER-GI

WP3: synthesis WP1 + WP2 >> general grid(s) GI-system analysis	WP4: case selection criteria (strategic)	WP8: Dbase 100+ cases >> 50+ cases (variety)
	Operational grid for field research + methods	

WP5: Case studies > WP6 Synthesis Impact

Criteria from project scope

- **A. 'New' contexts > assure context has typical effect on the case**

- **B. 7 intensive studies > no one-issue comparisons > no typological criteria**

- **C. Few cases > substantial amount of info still lacking on case**

- **D. Impact of GI protection > assure protection construction is hot issue**

Implications project scope (cont.)

- **! Not too high expectations these criteria assure good research outcomes**

- **! SINER-GI proposal: 3 axes (supply chain; governance; institutions/legal) .... rather WP4 field research (<< WP3)**

- ■ **E. If scope = prove potential of GIs in DCs > take example cases** *(Denis: how!)*

Practical criteria

- ■ **F. Guarantee good results > good researchers + local contacts**

- ■ **G. Maximize lessons > select cases were a lot happens > 'half-mature' ...**

- ■ **H. Maximize info on supply chain > take cases with also generic versions**

- ■ **I. Many criteria > ample case info**

Funnel procedure

F1: good local researchers

FILTER

F2: case reflects context

F3: protection a.o. issues (info lacking)

F4: half-mature / transition phase

SORTER

S1: Highly different contexts
S2: Min. … up-coming econ.
S3: Min. … strategic foods
S4: …

Sorting procedure: simplify

Possible combinations with 3 binary criteria

Case nr.	Criterion 1	Criterion 2	Criterion 3
1	**yes**	**yes**	**Yes**
2	**yes**	**yes**	no
3	**yes**	no	**yes**
4	**yes**	no	no
5	no	**yes**	**yes**
6	no	**yes**	no
7	no	no	**yes**
8	no	no	no

Additional cases?

- **Satelite cases (if EU > compare contexts > take similar cases; if same country/region area > very different cases)**

- **Additional cases by associated researchers (same methodology)?**

- **Extra analysis cases data-base (methodology ... rough comparisons, typologies etc. <)?**
