

# **Socio-technical qualification of the beef meat origin**

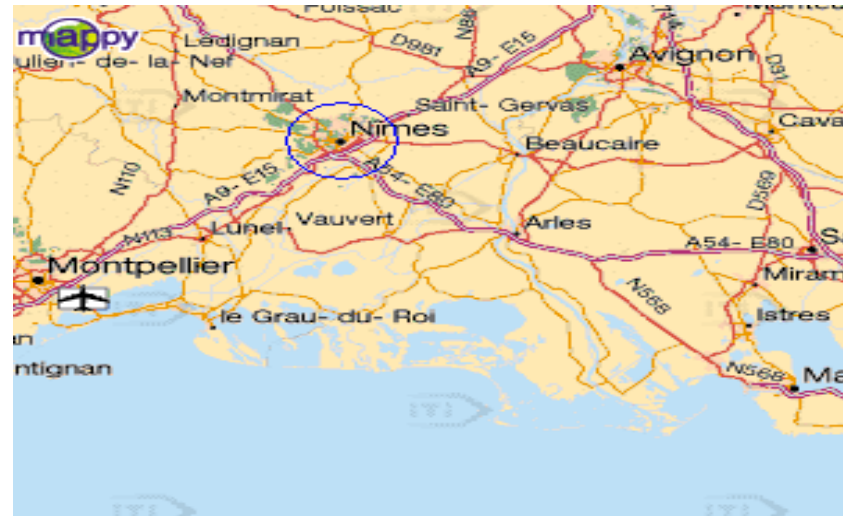

**Nicolas TRIFT**

**Presented by Vanessa PERSILLET**

**INRA Agrarian System and Development**

**- Corte, France -**

# PDO Taureau de Camargue

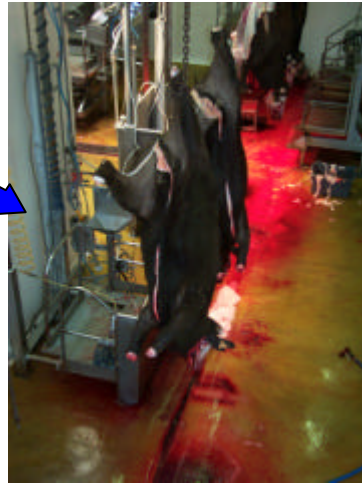

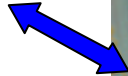

- Two breeds « raço di biou », « de combat » or cross breed
  - Genetics selection based on capacity for bull-fight and not for meat production
  - Wild bull = heifer + cow + Bull
- 92 breedings in PDO area

*First and only french PDO for beef meat*

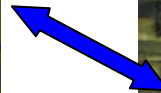

# Bad conformation of the carcasses

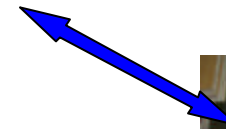

- Living bull (stuffed ...)

- Slaughtering
- Bleeding
- Trimming

- No evaluation on a standard grid but a specific grid

- Specific carving

# Links between activities

## From disqualified carcasses to qualified meat

*Collective agreement between breeders and butchers on Specific technical system :*

- *creation of a code of practices*
- *definition of carving operations, specific grid of classification*
- *Slaughtering fonctions*

***Qualification of the beef meat***  
**(and possiblity to valorise carcasses with bad conformation)**
